Hioox
TAAVETTI
OFFICE FURNITURE ONLINE

HiBox defines spaces but maintains visual connections. Provides a degree of privacy but doesn't isolate.

The choice of heights and widths allows great flexibility of layout. Each module features a combination of cubes comprising open shelves, shelves with backs and cubes with flush front, push-release doors.

You can specify matching or contrasting finishes for the carcasses, and the doors and backs — from an extensive palette encompassing woodgrain, solid colour and soft touch MFCs, and real wood veneers.

HiBox — distinctive and intelligent division of space.
